Comput的双语例句

- 1、A comput program including tunneling effect and curvature correction on the

thermal rate constants for unimolecular reactions has been introduced.

介绍了一个包括隧道效应和曲率校正的单分子热反应速率常数的计算程序，该程序以微正则速率常数为基础，通过积分的方法求得热速率常数。

2、Comput control system in high-pressure hydrogenation experiment

高压加氢实验的微机控制系统

3、In this paper we compare the different methods of velocity computing in ADCP data processing and discuss the principle, characteristic and result of method using reference layer to comput vessel velocity.

本文对不同的船速计算方法进行了比较，对使用参考层法计算船速的原理、特点和效果进行了论述。

4、After data processing, exposed curves of camera shutter or flash lamp are shown on screen of the Apple- comput-er.

最后将快门或闪光灯曝光曲线在Apple- 计算机屏幕上进行显示。

5、Application of the Computer Distributed Control and Modularization Frame in the Public Telephone Centralized Comput Fee and Management System

计算机集散控制与模块化结构在公用电话集中计费与管理系统中的应用

6、But this fact is easily grasped and incorporated into a risk assessment: no conceptual work for adapting impact analysis to cloud comput ing seems necessary.

但是这个实际情况是很容易把控和纳入风险评估的：看起来不需要在概念上做出什么变化来适应云计算环境下的影响分析。

7、This article narrated a way in which using FY85 stereoscopic direction equipment and PHOENIX comput aided to three dimensional space coordinate of the foreign matter in the head, to carry out with logical program.

本文阐述了应用FY85 - 型立体定向仪辅以EL - 506H计算器对颅内异物的三维空间坐标值进行逻辑编程处理实行颅内异物定位的方法。

8、Vulnerabilities that are relevant for all cloud comput ing components typically concern the provider-or rather users' inability to control cloud infrastructure as they do their own infrastructure.

所有云计算组件的漏洞，或者更确切地说，无法让用户像控制自己的基础设施一样控制云计算基础设施，通常都让提供商感到担心。

9、 The system takes image from CCD camera, then samples the video signal, at last uses ADSP to do the image procession and pattern recognition and outputs the result from 486 comput-er.

该系统采用面阵CCD摄象，经Bt812数字化器进行视频信号采集，运用ADSP完成实时图象处理与识别，最后由工控486微机输出测量结果。

10、 Still it is hard to the influence of BG on comput.

比尔盖兹在计算机领域中的影响现在仍然很难估量。

11、 NET component, the paper also studys the break in turn in short circuit comput in g.

NET组件，本文还对短路计算中的轮断问题进行了研究。

12、 The achieve is expounded in detail in navigation and positioning system for vehicles on GPRS, it includes the establishment of GPRS network communication chain, the communication course about termination mainframe and service comput of monitoring center.

重点阐述了GPRS在车辆导航定位系统中的实现，主要包括GPRS网络通信链路的建立以及终端主机与监控中心服务器的通信过程。

13、 According to the spot condition, we adopt the way of interrupt receiving and inquiry sending data, Master Comput-er programmes are programmed by adopting Turbo C2.0.

根据现场实际情况，我们采用了中断接收及查询发送数据方式。主机程序全部采用Turbo c2.0编程。

14、 Benchmark of large scale computational chemistry software on the personal computers and workstations

个人计算机和工作站上计算化学软件性能的综合测评
