

《单词百科:dbps是什么意思?dbps怎么发音?dbps的解释和用法》

英语单词dbps是什么意思?dbps怎么读?dbps怎么发音?简答网为您整理了dbps的解释、用法、例句、词组等相关学习资料。下面跟小编一起来看看吧!

dbps的意思

1、消毒副产物；氯化消毒副产物；产物

dbps的双语例句

1、At present, enhanced coagulation is the best available technology to control DBPs.

强化混凝是目前控制消毒副产物的最佳可行性技术。

2、However, there are few studies focusing on organic matter removal in the SSF, especially for DBPs removal.

然而在探讨两种机制对于有机物去除之影响，相关研究甚少，尤其对于消毒副产物方面更为缺乏。

3、 Effect of By-products of Chlorination Drinking Water DBPs on Health

氯化消毒饮用水副产物DBPs对健康的影响

4、 DBPs Formation Characteristics in Chlorinating and Relationship with Chemical Structure of Some Aromatic Organic Matter

芳香类有机物生成氯化消毒副产物特性及其与化学结构的关系

5、 Influence of Irrigation Pattern on DOC and Formation of DBPs Precursors in Soil

灌溉模式对土壤中DOC及DBPs前驱物形成的影响

6、 The analytical ways concerning DBPs of environmental toxicology;

DBPs的环境毒理分析方法；

7、 To find nucleotide binding sites of DBPs by comparing the promoter sequences of insulin gene

利用序列比较寻找胰岛素基因表达启动区与DNA结合蛋白的结合位点

8、 Removal of Precursors of DBPs by Combined Process of Catalytic Ozonation and BAC

臭氧催化氧化与BAC联用控制氯化消毒副产物

9、 Controlling Chlorine DBPs Precursor by Combined Preoxidation with Ozone and Permanganate

臭氧/高锰酸盐复合预氧化控制氯化消毒副产物前质

10、 Influence of Chloramine Disinfection on DBPs from Different Organics

氯胺消毒对不同有机物生成消毒副产物的影响

11、 Disinfection by-products (DBPs), which have adverse effects on human health, are produced in drinking water disinfection process.

饮用水消毒过程中会产生一类对人体具有三致效应的消毒副产物 (DBPs)。

12、 Nitrate Removal Using Biodegradable Polymers (DBPs) as Carbon Source and Biofilm Carrier of Denitrifying Microorganisms

利用可生物降解聚合物同时作为反硝化微生物的碳源和附着载体研究

13、 Objective To explore the distribution of the concentrations of disinfection by-products (DBPs) and its characteristics in drinking water.

目的研究生活饮用水中消毒副产物 (DBPs) 的分布水平及其规律。

14、 According to the theoretical analysis and practical verification, the method using DBPs to evaluate the synthetical working performance of CCP is completely feasible.

经过理论分析和实践工程验证，利用路面弯沉盆参数 (DBPs) ，通过模型对水泥混凝土路面的工作性能进行综合评价这一方法完全可行。

15、 The types and distributions of DBPs were under the influence and restriction of MCs type, disinfectant dose and reaction time.

典型DBPs产物类型与分布受MCs类型和消毒剂量的影响与制约。

16、 On the benzene ring, hydroxyl group has the highest activity of forming DBPs, and the second is ketone group;

苯环上羟基官能团生成消毒副产物的活性最高，酮基官能团次之；

17、 An investigation of the combined process of catalytic ozonation and biological activated carbon for the removal of DBPs precursors was conducted.

研究了臭氧催化氧化与生物活性炭联用技术对氯化消毒副产物 (DBPs) 的控制效能。

18、 Compared with liquid chlorine disinfection, chloramination has low quantity of disinfection by-products (DBPs).

相对氯消毒，氯胺具有消毒副产物生成量低的特点。

以上是简答网为您整理的dbps怎么读的相关信息，希望对大家有一定的帮助。查看更多关于dbps的用法、dbps
