

《高考英语阅读理解真题126(含答案解析)》

2018年全国卷二

B

Many of us love July because it ' s the month when nature ' s berries and stone fruits are in abundance. These colorful and sweet jewels from British Columbia ' s fields are little powerhouses of nutritional protection.

Of the common berries, strawberries are highest in vitamin C, although, because of their seeds, raspberries contain a little more protein(蛋白质), iron and zinc (not that fruits have much protein). Blueberries are particularly high in antioxidants (抗氧化物质). The yellow and orange stone fruits such as peaches are high in the carotenoids we turn into Vitamin A and which are antioxidants. As for cherries(樱桃), they are so delicious who care? However, they are rich in Vitamin C.

When combined with berries or slices of other fruits, frozen bananas make an excellent base for thick, cooling fruits shakes and low fat “ ice cream ” . For this purpose, select ripe bananas for freezing as they are much sweeter. Remove the skin and place them in plastic bags or containers and freeze. If you like, a squeeze of fresh lemon juice on the bananas will prevent them turning brown. Frozen bananas will last several weeks, depending on their ripeness and the temperature of the freezer.

If you have a juicer, you can simply feed in frozen bananas and some berries or sliced fruit. Out comes a “ Soft-serve ” creamy dessert, to be eaten right away. This makes a fun activity for a children ' s party; they love feeding the fruit and frozen bananas into the top of the machine and watching the ice cream come out below.
